

ALEX T. LARWEH

Software Engineer | AI Automation Engineer | Agentic Coding Evaluation

Accra, Ghana | +233 540 286 280 | lexlar2017@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Software Engineer and AI Automation Engineer with 5+ years of code-heavy experience across full-stack web development, backend systems, technical support, and AI automation workflows. Experienced in Python/FastAPI, JavaScript, PHP/Laravel, SQL databases, Git, Linux/Unix environments, and production workflow automation. Strong background in debugging, validating application behavior, inspecting workflows, integrating APIs, and translating requirements into reliable software solutions.

CORE SKILLS

Programming	Python, JavaScript, PHP, SQL, HTML, CSS
Backend	FastAPI, Laravel, REST APIs, workflow orchestration, backend integrations
Frontend	React.js, Next.js, Vue.js, Tailwind CSS, Bootstrap
Databases	PostgreSQL, Supabase, MySQL, vector storage for RAG
AI and Automation	OpenAI API, n8n, RAG systems, AI agents, WhatsApp automation, email automation
Engineering Tools	Git, Linux/Unix, Docker, CLI workflows, Google Analytics 4
Validation	log inspection, manual testing, API troubleshooting, workflow validation, technical documentation

PROFESSIONAL EXPERIENCE

AI Automation Engineer | Kioobi SRL, Italy | January 2026 - Present

- Build backend AI automation systems using Python, FastAPI, n8n, OpenAI APIs, PostgreSQL, and Supabase.
- Design multi-step automation workflows across business operations, customer interaction, and internal process automation.
- Integrate Supabase and vector-based retrieval patterns to support contextual AI responses in RAG workflows.
- Validate automation behavior by inspecting workflow execution paths, debugging failed steps, reviewing API responses, and improving reliability.
- Contribute to production-grade AI systems with attention to scalability, maintainability, and correctness.

Project Lead / Web Developer | Enokay69.com, Accra, Ghana | November 2022 – Dec. 2025

- Led full-stack web development projects from requirements gathering through deployment and maintenance.
- Built and maintained scalable Laravel applications using PHP, JavaScript, Bootstrap, HTML, CSS, and MySQL.
- Integrated third-party APIs and services to extend application functionality and support business workflows.
- Used Git for version control and collaborated with developers, security specialists, and stakeholders.
- Applied debugging, security, SEO, and analytics practices to improve application quality, visibility, and reliability.

IT Support Analyst | Betika Ghana, Accra, Ghana | July 2023 - June 2024

- Provided first-line technical support for hardware, software, network, and application issues.
- Diagnosed and resolved technical problems by analyzing symptoms, reproducing issues, and escalating where necessary.
- Supported and troubleshoot systems including Zendesk, FreePBX/Asterisk PBX, and NComputing.
- Built practical experience in structured troubleshooting, technical communication, and operational reliability.

Frontend Developer / Graphic and Product Designer | GoDropping Ghana Ltd, Accra, Ghana | 2019 - 2020

- Designed landing pages and email templates using HTML, CSS, and JavaScript.

- Identified UI/UX issues in company mobile and web applications, including responsiveness, speed, and usability problems.
- Manually tested websites and apps, documented findings, and prepared reports for the development team.

SELECTED AI AND SOFTWARE PROJECTS

AI Email Support System

- Built a production-deployed AI email support system with FastAPI as the backend logic layer and n8n for workflow orchestration.
- Automated email response handling by connecting AI processing, workflow routing, and business-specific response logic.
- Validated system behavior through workflow checks, backend review, and production deployment testing.

AI WhatsApp Receptionist

- Building an AI-powered WhatsApp assistant for customer inquiries and business workflow automation.
- Uses RAG for contextual responses and Supabase as the vector database for retrieval.
- Planned capabilities include automated replies, payment-processing workflows, and operational automation for businesses.

Client Web Development

- Built and supported WordPress websites for international clients in the UK, Germany, and Portugal.
- Delivered privacy-focused contact systems, Stripe and Calendly integrations, custom HTML/CSS, and CMS-based content management.
- Built Enokay69.com using Laravel and Bootstrap and Levotude.com using WordPress with custom HTML/CSS.

EDUCATION

Bachelor of Science in Computer Science | Ghana Communication Technology University (GCTU), Accra, Ghana
West African Senior School Certificate Examination (WASSCE) | Presbyterian Senior High School, Tema

ADDITIONAL LEARNING

- Agentic AI Engineering
- AI Automation with APIs and n8n
- n8n Workflow Automation
